

LUNETTEN

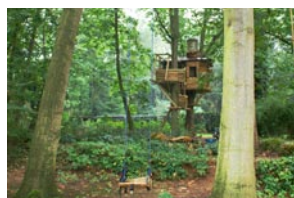

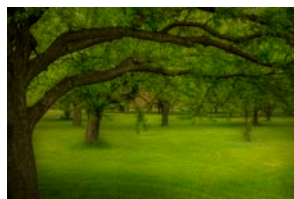

Target image: public path behind one of the lunet-fortresses, connecting the seperated plant-up areas with each other and with the city..

Typical Water-defence-line profile becomes basic principle for the whole parkland

Four lunetten with each it's own history. Each gets it's own character and typical program.

Project: Lunetten
Client: City of Utrecht
Location: Utrecht - The Netherlands
Area: 158 ha.
Duration: 2006-2008
Status: Ratified.
Partners: OKRA landscape architects

Master plan for the development of a green wedge with four historical fortresses, part of the New Dutch Water-defence-line, into a multifunctional urban parkland.
