

NIEUWERKERKERTOCHT

Scale of the polder: view over a primary polder drain canal.

Tree blocks of alternating orchard species create movement of blossom along the arterial road and human scale along the residential streets on the other side..

Early spring: colour waves in bulb carpets under the trees.

Late spring: waves in blossoming trees of alternating species.

Project: Nieuwerkerkertoch Zone
 Client: Council of Haarlemmermeer
 Location: Nieuw Vennep - The Netherlands
 Area: 22 ha.
 Duration: 1996-1999
 Status: Constructed
 Partners: OKRA landscape architects

Design for the public space around 2.1 km arterial road between a new residential area and the existing town.
