SCHALKHAAR

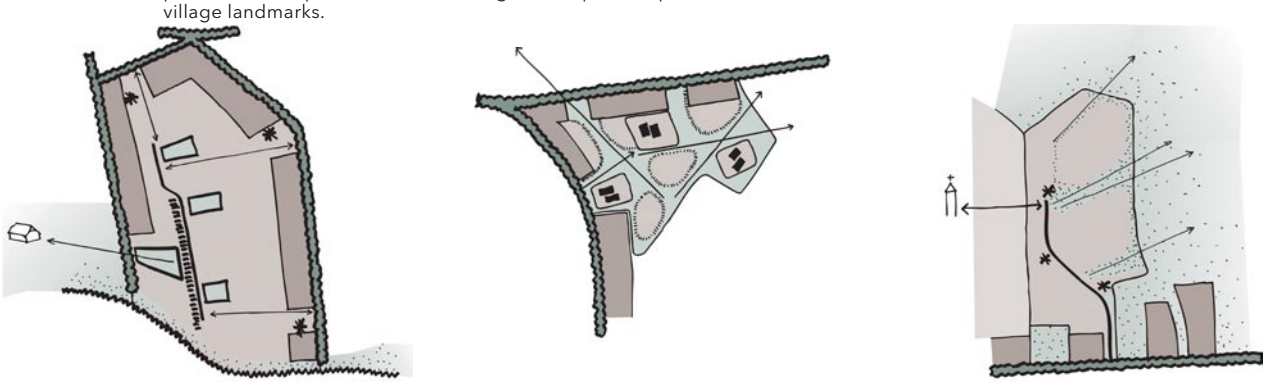
Characteristics of the existing village.

Project:	3 Neighbourhoods Schalkhaar
Client:	Koopmans project development
Location:	Deventer - The Netherlands
Area:	17.5 ha.
Duration:	2005-2008
Status:	Under construction
Partners:	OKRA landscape architects, BFAS architects & town planners.

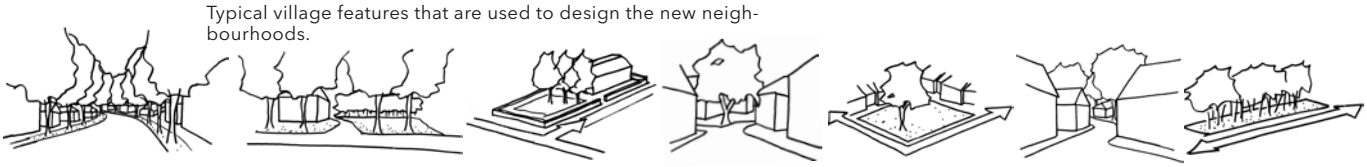
Urban plan and design public space for three new village-like neighbourhoods, enlarging the existing community.

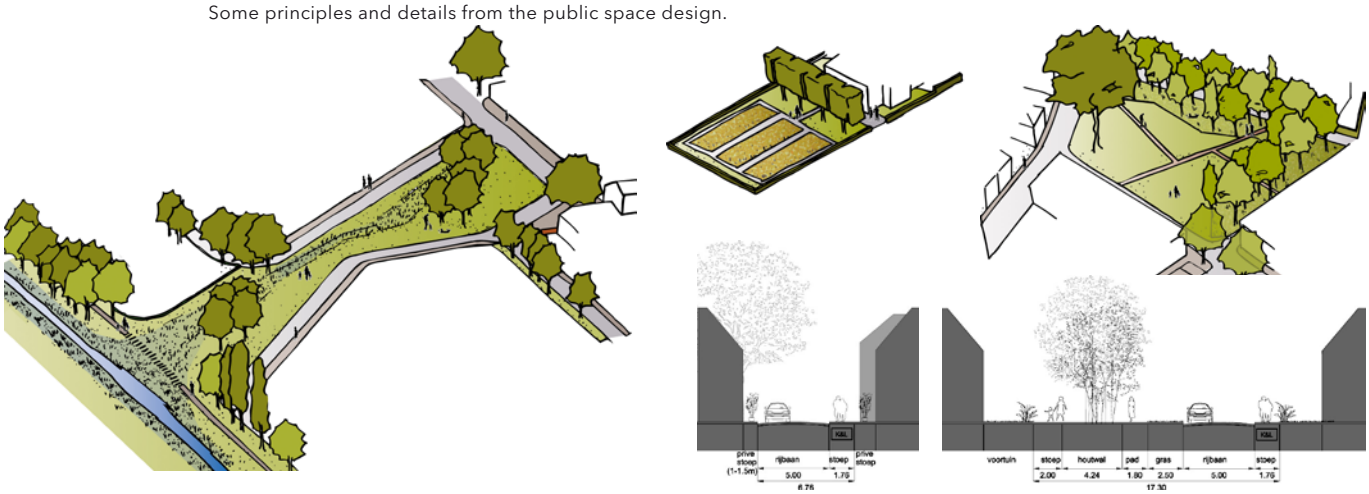
Impression of the scenario-game with the village community.

All three neighbourhoods are developed around their own typical relationship with the surrounding landscape and specific village landmarks.



Typical village features that are used to design the new neighbourhoods.



Urban ensembles, the new landmarks in the developments, get special architectural attention.


Some principles and details from the public space design.
